Chapter 1

What is Anthropology?

Anthropology is the most inclusive of the social sciences. Anthropology is the study of humanity, in all its aspects. If falls within the broader academic category of social sciences (**?**). Like many of those disciplines, anthropology grew out of Elightenment and coalesced into a formal scientific discipline during the early-1900's.

To get a sense of what the four, traditional subdisciplines of North American anthropology—cultural anthropology, biological anthropology, archaeology, and linguistic anthropology—encompass, see the videos below.

1.1 Cultural Anthropology

Figures and tables with captions will be placed in `figure` and `table` environments, respectively.

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

Reference a figure by its code chunk label with the `fig:` prefix, e.g., see Figure **??**. Similarly, you can reference tables generated from `knitr::kable()`, e.g., see Table **??**.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```

You can write citations, too. For example, we are using the **bookdown** package (**?**) in this sample book, which was built on top of R Markdown and **knitr** (**?**).

Chapter 2

Literature

Here is a review of existing methods.

Chapter 3

Methods

We describe our methods in this chapter.

Chapter 4

Applications

Some *significant* applications are demonstrated in this chapter.

4.1 Example one

4.2 Example two

Chapter 5

Final Words

We have finished a nice book.
